```c
#include<stdio.h>
 int sum(int a, int b);
int main() {
    int num1, num2, res;

    printf("\nEnter the two numbers : ");
    scanf("%d %d", &num1, &num2);

    //Call Function Sum With Two Parameters
    res = sum(num1, num2);

    printf("\nAddition of two number is : %d",res);
    return (0);
}

int sum(int num1, int num2) {
    int num3;
    num3 = num1 + num2;
    return num3;
}
```
